GROOVING AND PARTING

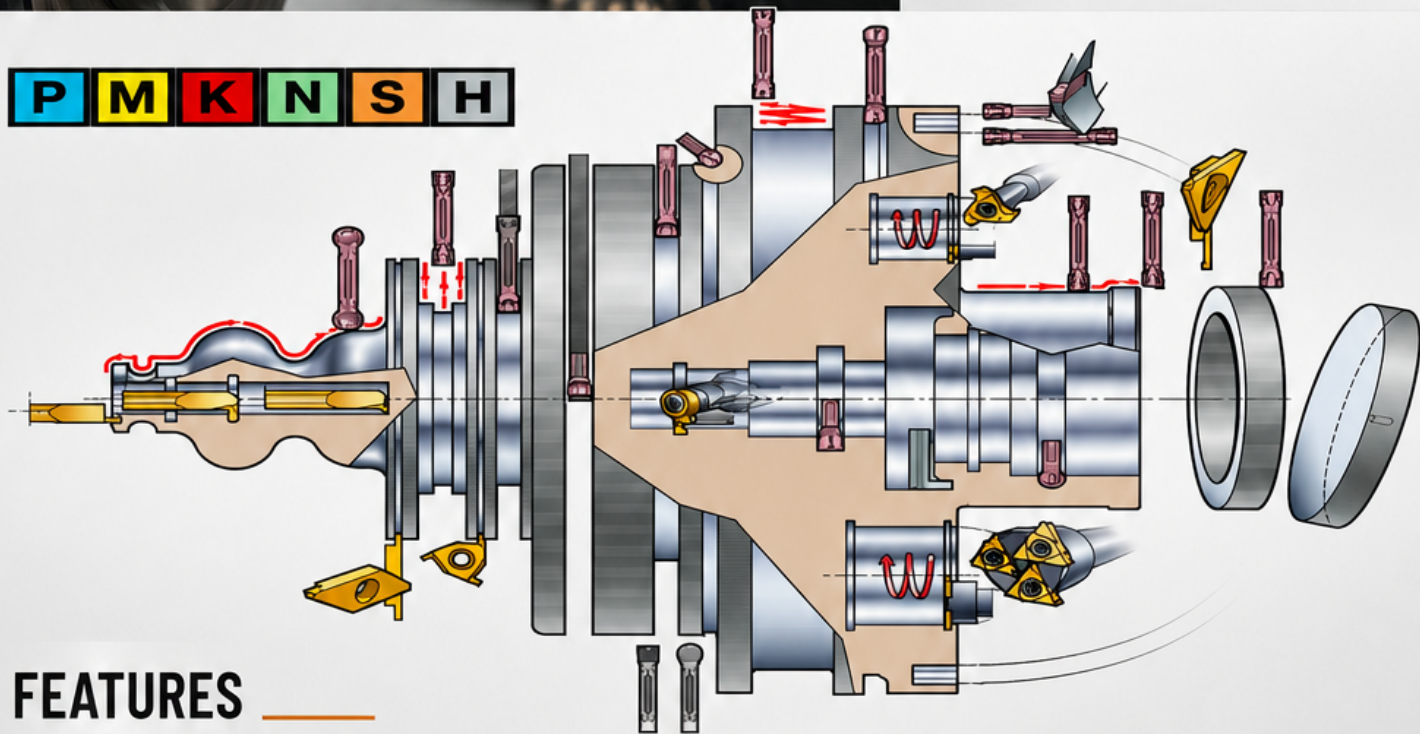

— PRECISION. PERFORMANCE. DURABILITY. —

GROOVING TOOL

PARTING TOOL

FEATURES

SUITABLE SUBSTRATE

Suitable substrate for steel grooving and parting and good wear resistance coating layer.

ADVANCED COATING

Application of coating surface treatment improving welding resistance and chipping resistance.

PRECISE PERFORMANCE

Ensures accurate grooving and parting operations.

EXCELLENT WEAR RESISTANCE

Superior coating and substrate provide longer tool life.

HIGH CHIPPING RESISTANCE

Optimized coating surface treatment minimizes edge damage.

CONSISTENT QUALITY

Reliable performance for a wide range of materials.
